DRAFT STATEWIDE POLICY: INFORMATION SECURITY CONFIGURATION MANAGEMENT

EFFECTIVE DATE: MARCH 1, 2011
APPROVED: <DATE APPROVED>

I.   Statement of Management Commitment

Threats to information systems today include environmental disruptions, human errors, and purposeful attacks by hostile entities such as nation states, terrorist groups, hackers, criminals, and disgruntled employees. Senior management understands their responsibilities in managing the risks from information systems that support the missions and business functions of the organization. Attacks on information systems today are often well organized, disciplined, aggressive, well funded, and in a growing number of documented cases, extremely sophisticated. Successful attacks on public and private sector information systems can result in unauthorized disclosure or modification of highly sensitive information or a mission impacting denial of service.

For risks related to configuration management, senior leadership has made information security its first-order mission and business requirement.

II.   Purpose

This **Information Security Configuration Management Policy** (Policy) establishes the requirements to implement information security configuration management standard(s) and associated procedures within agencies.

III.   Authority

The State of Montana Chief Information Officer is responsible for developing policies, standards, and guidelines for addressing information security for agency operations and assets. This Policy is consistent with the requirements of the Montana Information Technology Act for securing information technology and §2-15-114 MCA. Security responsibilities of departments for data.

The Office of the Chief Information Officer of the State of Montana has developed this instrument to further the statutory responsibilities under §2-17-534 MCA. Security responsibilities of department, as delegated by the Director, Department of Administration.

IV.   Policy Statement

It is the policy of the State of Montana (State) that agencies shall develop and implement information security configuration management controls based on the National Institute of Standards and Technology Special Publications guidance.

V.   Applicability

This Policy is applicable to agencies and outsourced third parties (such as contractors, or other service providers), who have access to or use or manage information assets subject to the policy and standard provisions of §2-17-534, MCA. This Policy shall be communicated to those who have access to or manage information, and information systems and assets.

VI.   Scope

This Policy authorizes and requires the implementation of an information security configuration management standard and associated procedures for the information systems and assets managed or controlled by agencies.

This Policy encompasses information systems for which agencies have administrative responsibility, including systems managed or hosted by third-parties on agencies' behalf.

This Policy may conflict with other information systems policies currently in effect. Where conflicts exist, the more restrictive policy governs. Future policies or standards will specifically identify and retire any superseded portions of current policies or standards.

VII.   Definitions

Agency	Any entity of the executive branch, including the university system. Reference §2-17-506(8), MCA.
Information Security	The protection of information and information systems from unauthorized access, use, disclosure, disruption, modification, or destruction in order to provide confidentiality, integrity, and availability. Reference 44 U.S.C., Sec. 3542.
Information System	A discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information. Reference 44 U.S.C. Sec. 3502.
Information Resources	Information and related resources, such as personnel, equipment, funds, and information technology. Reference 44 U.S.C. Sec. 3502.
Information Technology	Hardware, software, and associated services and infrastructure used to store or transmit information in any form, including voice, video, and electronic data. Reference §2-17-506(7), MCA.

Refer to the National Information Assurance (IA) Glossary, at http://www.cnss.gov/Assets/pdf/cnssi_4009.pdf for common information assurance definitions.

Note: Because newer versions of the publications referenced herein become available from time-to-time, the latest publicly available versions at *the date of policy approval* shall apply. However, each agency is encouraged to stay current by using the most recent versions. Future revisions of this Policy shall reference then currently-available versions.

VIII. Authorizations, Roles, and Responsibilities

Refer to the Statewide Guidelines: Information Systems Security, paragraph II Authorizations, Roles, & Responsibilities for applicable authorization, roles, and responsibilities.

IX. Requirements

Each agency shall:

1. Implement this Policy and its associated standard(s) in compliance to, and integrated with guidance provided by the National Institute of Standards and Technology Guidance.

2. Establish a framework of standards and procedures to initiate, control and evaluate the implementation of configuration management security controls.

3. Establish and evaluate performance measures to assess implementation of this policy and subordinate standard(s) and procedures.

X. Compliance

Compliance to this Policy shall be evidenced by implementation of the Statewide Standard: Information Security Configuration Management.

XI. Change Control and Exceptions

Policy changes or exceptions are governed by the Procedure for Establishing and Implementing Statewide Information Technology Policies and Standards. Requests for a review or change to this instrument are made by submitting an Action Request form (at http://itsd.mt.gov/content/policy/policies/Administration/action_request.doc). Requests for exceptions are made by submitting an Exception Request form (at http://itsd.mt.gov/content/policy/policies/Administration/exception_request.doc). Changes to policies and standards will be prioritized and acted upon based on impact and need.

XII. Closing

Direct questions or comments about this instrument to the State of Montana Chief Information Officer at ITSD Service Desk (at http://servicedesk.mt.gov/ess.do), or:

PO Box 200113
Helena, MT 59620-0113
(406) 444-2700
FAX: (406) 444-2701
